## COMPETITIONS

---

- I took the **first place** on MSCOCO captioning leaderboard under my mentors' guidance. Specifically, we merged various kinds of CNN features (Inception-V3, Inception-V4, ResNet and DenseNet) into the attentive encoder-decoder framework and got a more stronger baseline model. Then we took the self-critic sequence training algorithm to fine-tune the baseline model until convergence.
- I took the **fourth place (top 1%)** as a team member in Google Cloud & YouTube-8M Video Understanding Challenge in May.
